

Reset voice mail password

Intent

#Reset_voice_mail_password

Dialog

I can help you with that! You can reset your own password from your device or online through Premier. You can also reset the password of users on the account. Although not recommended, you can also disable password requirements.

Please follow the instructions here for using your device.

1. To take action online, go to the I want to: drop down box in the upper left of the manage screen.

2. Select the Reset voicemail password option, enter the desired wireless number and click Go.

3. Follow the instructions on the screen and you got it!
