I can help you with that!

AT&T Dynamic Defense™ is a security platform embedded in the AT&T Dedicated Internet and AT&T Switched Ethernet with Internet Offload service that you can utilize to filter traffic, detect threats, and execute security controls before data reaches your network.

Click here to learn about how it works and its great benefits. There are other resources available including a short video!

You can log into Business Center here to update your account or manage your service online.
